password:       Demo1234!      (stored bcrypt-hashed)
coins:          250            (matches logged-in coin display)
favourites:     []
recentlyPlayed: []
lastDailyRewardClaim: null
```

Required 15+ Game Entries (Seed Data Titles)

Titles drawn from the reference images, distributed across the 6 categories. The developer may add more games beyond 15, but these 15 are mandatory:

#	TITLE	CATEGORY	NOTES
1	City Car Racer	Racing	Featured, trendingRank: null
2	Need for Speed	Racing	
3	Asphalt Legends	Racing	
4	Traffic Tour	Racing

API Endpoints (Base path /api)

All endpoints are served under the /api base path. Protected routes require a valid JWT Bearer token.

- GET /api/games — list games; query params category, trending, featured, search.
- GET /api/games/:id — single game with screenshots, reviews, and relatedGames.
- GET /api/games/trending — top 6 games by trendingRank (1 to 6).
- GET /api/games/recommended — recommended list, minimum 6 games.
- GET /api/categories — the 6 categories with game counts.
- GET /api/games/:id/reviews — list reviews for a game.
- POST /api/games/:id/reviews — submit a review (auth).
- POST /api/auth/register — create account; password hashed with bcrypt.
- POST /api/auth/login — authenticate and return a JWT.
- GET /api/auth/me — current user profile (auth).
- GET, POST, DELETE /api/users/favourites — manage favourites (auth).
- GET, POST /api/users/recently-played — recently played games (auth).
- GET /api/users/rewards — coin balance and canClaimDaily status (auth).
- POST /api/users/rewards/claim — claim the daily reward (auth).
- POST /api/newsletter/subscribe — store a newsletter email.

Authentication and Security

- Authentication is JWT based; passwords are hashed with bcrypt before storage.
- Protected routes require a valid Bearer token.
- Protected endpoints return 401 Unauthorized without a valid token: /api/auth/me, /api/users/favourites, /api/users/recently-played, /api/users/rewards, and POST /api/games/:id/reviews.
- No API response returns the password or the password hash.

Scope Boundaries (Out of Scope)

- Real multiplayer netcode or a playable game engine; launching a game shows a placeholder.
- Real payment processing or real money in-app purchases; the coin balance and rewards are simulated only.
- Native iOS or Android applications; delivery is responsive web only at 1440px, 768px, and 375px.
- Real email delivery for the newsletter; the subscribe endpoint stores the email only.
- OAuth or social login; authentication is email and password with JWT only.
- Backend features for Community, Friends, Leaderboards, Tournaments, Events, Clans, Forums, and Live Streams; these are navigation and footer links only.
- An admin or content-management dashboard; game data is loaded by the seed script only.
- Production hosting, CI/CD, or domain setup; a local end-to-end run is the delivery target.
